You Can Help Our Community

You can choose to help all individuals with primary immunodeficiency diseases by sharing information that does not identify you.

Your consent to participate in this important research feature will help:

« Researchers and healthcare providers better understand primary immunodeficiency diseases

« Improve treatment options

« IDF advocate for the primary immunodeficiency community

Your personal information will never be shared or disclosed.

The Immune Deficiency Foundation is the national patient organization dedicated to improving the diagnosis, treatment, and quality of life of persons with primary immunodeficiency diseases through advocacy, education and research.
